PROFESSIONAL SUMMARY

Full-stack developer with 5+ years building and scaling web/mobile applications end-to-end (React/Next.js,Expo, NestJS, MongoDB). Proven track record in 0-to-1 product development — reduced infrastructure costs by 70% and cut development effort in half across multiple startup MVPs. Experienced in microservices, cloud-native architectures (GCP/AWS), and leading frontend teams in enterprise settings.

CORE TECHNICAL SKILLS

- **Frontend:** React, Next.js, React Native, Zustand/State Management, Responsive UI, SSR/SSG.
- **Backend:** Node.js, NestJS, TypeScript, REST APIs, WebSockets, Mongoose, MongoDB.
- **Architecture & DevOps:** Docker, CI/CD, Microservices, Micro-frontend, AWS, GCP, FinOps.
- **Practices:** Code Review, API Design, Performance Optimization.
- **AI-Assisted Development:** GitHub Copilot, ChatGPT/Claude for code review & architecture.
- **Languages:** English (C1), Italian (B1), Turkish (B2), Persian (Native), Azerbaijani (Native).

PROFESSIONAL EXPERIENCE

Cosmico (Digital Agency, contracted to a2a digital hub – Enterprise IT) | Milan | 10/2025 – Present
Full-Stack Developer | Frontend Lead

- Established CI/CD pipelines with automated testing and preview deployments, cutting release cycle time by **~40%** across **3 enterprise digital-service projects**.
- Shipped a component library of **20+ reusable React/TypeScript components**, reducing feature delivery time across teams.
- Led frontend architecture and delivery, coordinating with cross-functional teams on shared UI libraries and API contracts.
- Integrated complex REST APIs with role-based authentication/authorization.

Stack: React, TypeScript, REST APIs, Docker, CI/CD, Git

Abstract (Healthcare Tech Platform, contracted for Luxottica – Fortune 500 Eyewear) | Remote | 03/2025 – 10/2025
Full-Stack Engineer (Freelance)

- Built and maintained backend services with **NestJS**, **TypeORM**, and **MongoDB** for a large-scale **microservices/micro-frontend** healthcare platform, ensuring data integrity and reliability.

- Developed reusable frontend components and flows in **React/TypeScript**, integrating with existing design systems.
- Improved service modularity and codebase structure using **Lerna** and a monorepo setup.

Log-e (Startup Studio, Milan) | Milan | 11/2021 – 01/2025
Software Engineer / Full-Stack Systems Developer

- **Reduced infrastructure costs by 70%** and development effort by 50% through strategic right-sizing, containerization, and automation across **4+ startup MVPs**.
- Led 0-to-1 product development, owning the full stack from UI to backend to infrastructure on **GCP** and **Docker**.
- Drove rapid prototyping and iteration cycles, implementing REST APIs in **Node.js/NestJS**, database models in **MongoDB**, and admin/user dashboards in **React/Next.js**.
- Collaborated directly with founders to translate business vision into technical specs, user stories, and production-ready features.

Stack: React, Next.js, React Native, NestJS, MongoDB, GCP, Docker, WebSockets

Notable Deliverables at Log-e:

Tiktaac – Event Management & Ticketing Platform

- Built a real-time ticket validation system with **NestJS** backend APIs, WebSockets, and a **React** web interface.
- Developed a **React Native** mobile scanner app for on-site ticket validation with offline-first capabilities.
- Integrated with local thermal printers and hardware devices to support high-throughput event check-ins.
- Implemented role-based access, analytics dashboards, and operational tools for event organizers.

Elegant Menu – Global SaaS Ordering Platform

- Developed a multi-tenant SaaS platform using **Next.js** (SSR) and **NestJS**, serving restaurants in **50+ countries**.
- Implemented core features: digital menus, ordering flows, payment integrations, and restaurant onboarding.
- Integrated with **Telegram** for real-time order notifications and operational alerts.
- Scaled the platform to **5000+ users**, optimizing database queries, caching, and deployment strategies.

CERTIFICATIONS & EDUCATION

- **Google Cloud Fundamentals: Core Infrastructure** – Google Cloud.
- **MSc, Mechanical Engineering Design** – Sapienza Università di Roma *(2019–2021)*
  (Thesis in Machine Learning at TU Darmstadt).
- **BSc, Mechanical Engineering** – Azad University of Tabriz *(2013–2017)*.
